

I recently received information that Sinclair Broadcasting made a decision to force their stations to broadcast an anti Kerry program just days prior to the November election.

Sinclair uses our public airwaves free of charge, and should be obligated to by the law to promote the public interest.

I feel that manipulating our interests in such a way will only be in the interest of the company and not the public, which it serves.

I hope that action will be taken to prevent companies from exploiting our democratic process, whether they support conservative, liberal, or other interests.

Thank you for your time,

Gregory Hoak Jr.
